#### Adalah's Report to the UN Commission of Inquiry, January 2015:

[http://www.adalah.org/uploads/2\\_Adalah-Submission-UN-COI-Gaza-2015.pdf](http://www.adalah.org/uploads/2_Adalah-Submission-UN-COI-Gaza-2015.pdf)

#### Key observations from the UN COI-Gaza report:

<http://www.ohchr.org/EN/HRBodies/HRC/ColGazaConflict/Pages/ReportColGaza.aspx>

- Para. 243 Observations re: tactics of targeting residential buildings and impact on civilians including women and children -- "These observations raise concerns that these strikes may have constituted *military tactics reflective of a broader policy*, approved at least tacitly by decision-makers at the highest levels of the GoI. Such tactics appear to have prioritized the perceived military objective over other considerations, disregarding the obligation to minimize effects on civilians."

#### Key points of COI-Gaza report regarding domestic accountability:

- Para. 619, "...a central failing of the investigation system stems from the dual responsibility of the MAG"
- Para. 632, failure of Israeli investigative system in the case of the four Bakr boys (on the beach in Gaza)
- Para. 640, failure to investigate the role of political and military leadership, "FFA mechanism [in Gaza] focuses on so-called 'exceptional incidents' suggesting a rather narrow approach, which may fail to take into account violations of international law that result from an intentional policy or military commander, which itself may fail to comply with international legal obligations. [...] There is therefore a need to look into the various stages of decision-making, notably in the design, planning, ordering and oversight go the military operations."
- Para. 641, unclear how AG is actively and wholly fulfilling his role to provide oversight of the MAG.
- Para. 644, "...the commission is not aware of any on-going investigations of senior officials for alleged violations of international humanitarian law or international human rights law."
- Para. 650, "Israel has failed to hold accountable those responsible for alleged grave violations of IHL and IHRL resulting from IDF actions during recent past active hostilities in Gaza."

#### Key concluding observations from COI-Gaza report regarding accountability:

- Para. 670, impunity prevails for violations of IHL and IHRL by Israeli forces
- Para. 671, "Questions arise regarding the role of senior officials who set military policy in several areas examined by the commission, such as in the attacks of the Israel Defense Forces on residential buildings; the use of artillery and other explosive weapons with wide-area effects in densely populated areas; the destruction of entire neighbourhoods in Gaza; and the regular resort to live ammunition by the IDF, notably in crowd-control situations, in the West Bank. In many cases, individual soldiers may have been following agreed military policy, but it may be that the policy itself violates the laws of war."

- Para. 672, "The commission's investigations also raise the issue of why the Israeli authorities failed to revise their policies in Gaza and the West Bank during the period under review by the commission. Indeed, the fact that the political and military leadership did not change its course of action, despite considerable information regarding the massive degree of death and destruction in Gaza, raises questions about potential violations of international humanitarian law by these officials, which may amount to war crimes. Current accountability mechanisms may not be adequate to address this issue."
